INTRODUCING G-FLEX GRID COUPLINGS FROM TB WOOD'S DESIGNED FOR RELIABILITY AND PERFORMANCE

January 29, 2008 — Chambersburg, PA — TB Wood's Incorporated, an Altra Industrial Motion Company, announces the availability of TB Wood's G-Flex Grid Couplings based on state-of-the-art Bibby Transmissions design.

G-Flex Couplings increase protection against shaft misalignment and vibration. The G-Flex grid spring is shot-peened to create a protective surface layer that resists fatigue and stress corrosion, dramatically increasing the strength and working life of the grid. The result is excellent reliability and maximum performance in demanding applications.

TB Wood's G-Flex Grid Couplings are interchangeable with industry-standard Grid Couplings. Two models are available in stock: 1000T10 features a horizontal split cover, ideal for limited space applications; and 1000T20 features a vertically split cover, ideal for higher running speeds.

For more information, contact TB Wood's Incorporated at 888-829-6637 or www.tbwoods.com.

About Altra Industrial Motion

Altra Industrial Motion is a leading multinational designer, producer and marketer of a wide range of electromechanical power transmission products.
